The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4, 12-13 and 16-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Detweiler.

In particular, the reference teaches a plenum (76) which is part of an engine intake assembly. Within the plenum is a bellows that is biased by a spring and the bellows will expand and contract to change the volume of the plenum. The applicant will note that the claims do not require that the assembly claimed be the entire intake into the engine. The pathway through the plenum noted will be part of the engine intake flow.

Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 6-7, 9-11 and 14-15 are allowed.

Applicant's arguments filed July 27, 2005 have been fully considered but they are not persuasive. In particular, the examiner has now applied newly discovered art to some of the previously allowed claims and thus this action has been made non-final.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Carl S. Miller whose telephone number is 703-308-2653. The examiner can normally be reached on MTWTHF.
